Rescuing good, surplus food  
that would otherwise go to  
landfill and distributing it.

[midsurreycommunityfridges.co.uk](https://midsurreycommunityfridges.co.uk)

**Circular Dorking** is a network of businesses, community groups and individuals who are working together as volunteers to strengthen our Dorking community, by creating a local circular economy at its heart. This will mean we are all better placed to support each other to deal with the challenges of climate change and future uncertainty.

Our activities encourage local businesses to act sustainably, to make the best use of their materials and to minimise waste. We are sharing the best practices so that businesses can learn from each other. We are also signposting and enabling the wider community to make better informed choices. This will help all of us to move forward into the safe and sustainable future to which we all aspire and that our planet deserves.

Shopping locally means that money circulates within the local economy whilst strengthening and benefiting our local community.

Everyone wins! What's not to like about our local community supporting itself and each of us to be sustainable and more community-minded?

**Join us! Help get this done and celebrate our successes for all!**

#### RE-USING

##### **Dorking Community Wardrobe**

Donated clothing saved from  
landfill and redistributed.

[thecomunitywardrobe](https://www.facebook.com/thecomunitywardrobe)
